

OC ECO T-TOP BOLLARD®

An environmentally sustainable product, creating positive social change

The OC Eco T-Top Bollard® is an Australian first - made from 100% recycled plastics right here in Australia by a Social Traders certified social enterprise. Benchmarked against leading imported bollards made from virgin plastics, the OC Eco T-Top Bollard® is incredibly durable, flexible and long lasting.

Made from a specially formulated proprietary blend of LDPE/HDPE to optimise strength, flexibility and durability, the OC Eco T-Top Bollard® is a blend of recycled LDPE/HDPE and is compliant with AS/NZS1906.1, making it the ideal choice for Traffic Management Operators and Civil and Construction companies working on major government funded projects.

Free recycling service for damaged and end of life bollards available in limited areas.
